**Current Claim System Update**

Staff reminded the committee of the situation of the one year contract with our current vendor expiring on April 1, 2024 and the forthcoming increased costs with that vendor. One option for PRISM, and all those on their current claims system contract, is to move to another cloud hosting vendor. PRISM staff has been exploring this option and has a proposal from a vendor with claims system experience. Staff explained the details of the proposed move to another cloud hosting vendor including the timing and cost. Also discussed was the experience of the proposed vendor and how that would benefit the organization.

While there is still some details to work out with the agreement, the Committee expressed support and voted in favor of moving to the new cloud host vendor.
